

# Recruit Release Notes Changes Launching 2015-03-20

## Compliance

Recruit now **locks editing of the qualifications areas** once the search plan is approved.

We also **lock title codes** at the same time and for compliance reasons. If you advertised with the wrong title codes you need to open a new recruitment.

The **Document Viewer** got a **visual update** that brings it in line with the new style. Viewing large images is now much easier, and seeing what files are and are not available is now possible without jumping back to the applicant review page.

The **applicant bundle file name** now matches the last-name-first format used in the application itself.

## Reports

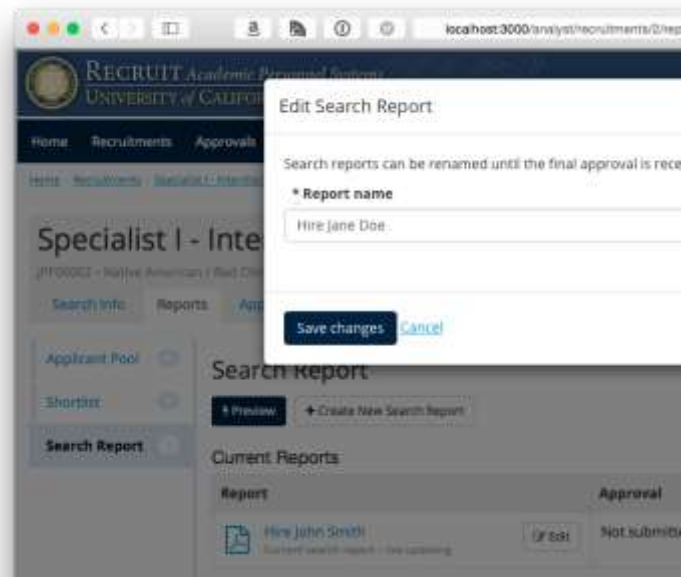

You can now **edit search report names** to reflect the changes made as you move through the recruitment process. Edits can be made until the search report is approved.

## Recruitment Data

Applicants **offer information** is now available.

## Design

You'll notice Recruit is getting a little more color in its cheeks, with new UC Blue links that do a lot better job of standing out on the page.

## Notable Bugs Fixed

- Large text areas (Equity Advisor Role, Qualifications, etc) could get truncated in the PDF reports. We have changed the formatting to avoid this error.
- The list of Disposition Reasons that each recruitment uses is now displayed in alphabetical order.
- We updated the messages shown to applicants to be consistent about their deadlines and the recruitment's review dates.
