Recruit Release Notes Changes Launching 2016-05-19

Recruitments

We made a change to the specializations model to clarify that edits to an existing specialization title are not yet saved. When editing a specialization, the field **button will display OK**, as opposed to the previous vague EDIT button.

We hope this will prevent confusion when editing specializations.

Update Ethnicity Tracking

Though it is not launching until July 1st, we have made progress in our new self-identification diversity survey for applicants.

Support Documentation

See the most up-to-date documentation via the Help menu and the most recent version of the user guide on the Recruit project site.
