

Recruit Release Notes Changes Launching 2016-1-27

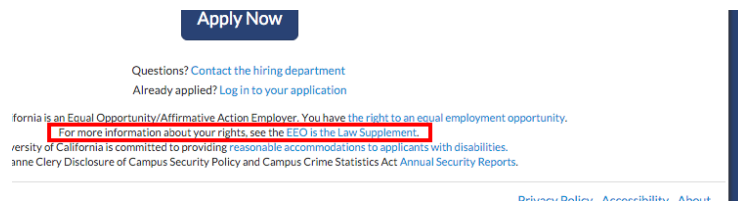

Design

Replaced the term “**Diversity Reports**” in the system with the more accurate and more universally understood “**Applicant Pool Report**” and “**Shortlist Report**”, as appropriate. The old term was a holdover from when these two were the only recruitment-level reports in the system.

Compliance

We added an **EEO is the Law poster supplement** on the apply page and recruitment details pages, to be sure that it is available to potential applicants.

Added a new **Job Location** field that will be filled out when creating a recruitment. The field aids in our compliance efforts and our Academic Job Exchange collaboration, especially where the job is located off-campus. The analyst enters the city and state, and Recruit displays it to applicants on the recruitment details page.
